

Ceremony

safranin sound & design

Ceremony have been churning out great pop songs full of sonic extremes and electronic mayhem for a few years now. Their first self titled record melted speakers with hot fuzz and reverbed vocals. With sounds that harken back to Phil Spector era production and melodies that are instantly stuck in your head, you will be glad you pick up anything this band puts out. You may know Paul & John from the now legendary Skywave, but since they have expanded out into new territories of sound.

Live, Ceremony cranks the drum machines and brings the noise in full effect. John plays tight bass lines and Paul has more sounds under his sleeve than three guitar players with tons of pedals. Live or on record, Ceremony hit full throttle and never brake to catch a breath.
